## Professional Summary

---

Cybersecurity enthusiast skilled in Ethical Hacking, Penetration Testing, Vulnerability Assessment, Web Security, and Network Security. CEH Master certified with practical experience using cybersecurity tools and security testing methodologies.

## Technical Skills

---

**Cybersecurity:** Penetration Testing, Vulnerability Assessment, Network Security, Web Application Security, OSINT, Incident Response

**Tools:** Kali Linux, Burp Suite, Metasploit, Wireshark, Nessus, OpenVAS, Nmap

**Technologies:** PHP, MySQL, HTML, CSS, Linux, Networking, Basic Python

## Education

---

**JSPM University, Pune** 2025 – 2027

Master of Computer Applications (MCA) – Cybersecurity

**MIT ADT University, Pune** 2022 – 2025

Bachelor of Computer Applications (BCA) – Applied Data Science

**Shri Dawale Junior College, Akola** 2020 – 2022

Higher Secondary Education (Science)

**Sitaramji Ganorkar English School, Pathrot** 2020

Secondary School Education (10th Standard)

## Certifications

---

- Certified Ethical Hacker CEH (Master) – EC Council
- Ethical Hacking Essentials – EC Council
- Network Defence Essentials – EC Council
- Introduction to Cybersecurity – Cisco
- Certified Cyber Warrior – HackingFlix Academy

## Experience

---

**CodeAlpha – Cybersecurity Intern** 2025

- Performed vulnerability assessment and penetration testing on 5+ practice web applications using Burp Suite and Kali Linux.
- Analyzed 1000+ network packets during hands-on cybersecurity and traffic monitoring tasks.
- Improved understanding of Linux systems, networking, and ethical hacking methodologies.

**Prodigy InfoTech – Cybersecurity Trainee** 2025

- Conducted security simulations and identified vulnerabilities in multiple web applications.
- Worked with tools including Wireshark, Metasploit, and Nmap for network security analysis.
- Completed 10+ practical cybersecurity tasks focused on vulnerability assessment and security testing.

## Projects

---

- **Network Packet Sniffer** – Developed a tool for monitoring and analyzing 1000+ network packets.
- **Image Encryption Tool** – Built a secure encryption and decryption system for image protection.
- **Bug Bounty Participation** – Identified security vulnerabilities in web applications through ethical testing.
- **Online Examination System** – Developed a secure web-based examination platform.
- **Disease Prediction System** – Built a PHP and MySQL based prediction system using symptoms.

## Soft Skills

---

Problem Solving • Communication • Teamwork • Leadership • Analytical Thinking • Adaptability • Time Management
